-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951). Hence in claims 1-3 the following art rejection applies

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brice in view of Franke et al .

Brice discloses motor control comprising a transmitter for emitting a radio signal, a receiver response to signal and receiver connected to a switching device activated by receiver and switching device for controlling current to actuator , see col 3 lines 1-50. Brice lacks disclosing polarity of current and reversible actuator. Franke et al discloses polarity reversed so actuator is reversed , see col 3 lines 45-50 and col 4 lines 15-25. IT would have been obvious to one or ordinary skill in the art to combine the motor control of Brice with polarity reversing of actuator for improved control.

Art Unit: 2837

4. Claims 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haynes in view of Brice , Franke et al and Millis et al .

Haynes discloses motor control for mobile living quarters having a slideout room , see abstract. Haynes lacks disclosing receiver and transmitter , polarity to current to motor , and bypass switch and cutoff switch. Brice discloses receiver and transmitter , see col 3 lines 1-50. Frank et al discloses polarity of current to actuator, see col 3 lines 45-50 and col 4 lines 15-25. Millis et al discloses bypass switch and cutoff switch, see col 3 lines 40-68 and col 4 lines 30-40. It would have been obvious to one of ordinary skill in the art to combine the motor control of slideout room of Haynes with receiver and transmitter of Brice to prevent problems from outside of the periphery of the slideout room, and the polarity and switches for improved control and protection .
